Description: This seminar will emphasize HOW to find small remedies in daily practice. The teachers will present cases to explain how the small remedy can be found in each example. This will be done in an interactive way, so all participants are invited to bring Repertory and Materia Medica. For each case, the remedy will be described in full and hints on the use of Repertory and therapeutic strategy will be given.

Dr Frederik Schroyens, MD, FFHom, FFHom (Hon.) was one of the Radar users in 1986 and has become the homeopathic co-ordinator of the Radar project soon afterwards. He has been lecturing and holding workshops on the use of homeopathic software in most European countries as well as in North and South America since 1983. He has been accompanying George Vithoulkas on his seminars since 1988 as well as assisting him during most of his consultations since that time until 1995.

Dr Guy Kokelenberg has more than 30 years of clinical experience and a long teaching experience. He is the co-author of the Kent's Comparative Repertory of the Homoeopathic Materia Medica which is of great assistance in understanding the exact meaning of each rubric and of each patient's symptoms. He is the guest speaker at numerous seminars in Europe and the US supervising homeopath in Germany, Austria & UK.
